

DOUBLE AXIS PLANETARY EXTRACTORS

Extractors for silo with a diameter from 13 to 25 meters.

Employed in the food and chemical industry.

An inspection beam links the center of the silo to the walls.

Maintenance operations also with silo full of product.

The extraction screw stops under the beam when not in use .

Hydraulic or electric drives.

"First in first out" extraction system.

Extraction capacity up to 360 m³/hour.

Each extractor will be dimensioned from our technical department according to the physical characteristics of the product.
