

ROTATING SCREW EXTRACTORS

Rotating screw extractor for flat bottom silos with diameter up to 18 meters. The screw, open on one side and covered on the other side, by rotating on the flat bottom of the silo, allows the discharging of the residual cone.

Extraction capacity up to 60 m³/hour.

Rotating screw extractor is suitable to foodstuff, grains and seeds in the agricultural-food industry.

Each Rotating Screw Extractor is dimensioned from B.S.P. Engineering technical department according to the physical characteristics of the product, to the silo size and to the requested capacity.
